

# **CPI Residual Solids as a Potential Source for Construction Materials**

**By Tarun R. Naik and Rudolph N. Kraus**

Report No. CBU-2000-23

## **ABSTRACT**

The sources of CPI residual fibers tested for this project have considerable potential for many applications. The following are some of the high-volume applications that would require further evaluation. These applications have the potential to consume all of the residual solids produced at Consolidated Papers' Biron and Interlake Fiber mills.
